

# GoLang Group Project

Atri Hegde

# Framework we are going to use.

BubbleTea is a TUI framework for golang.

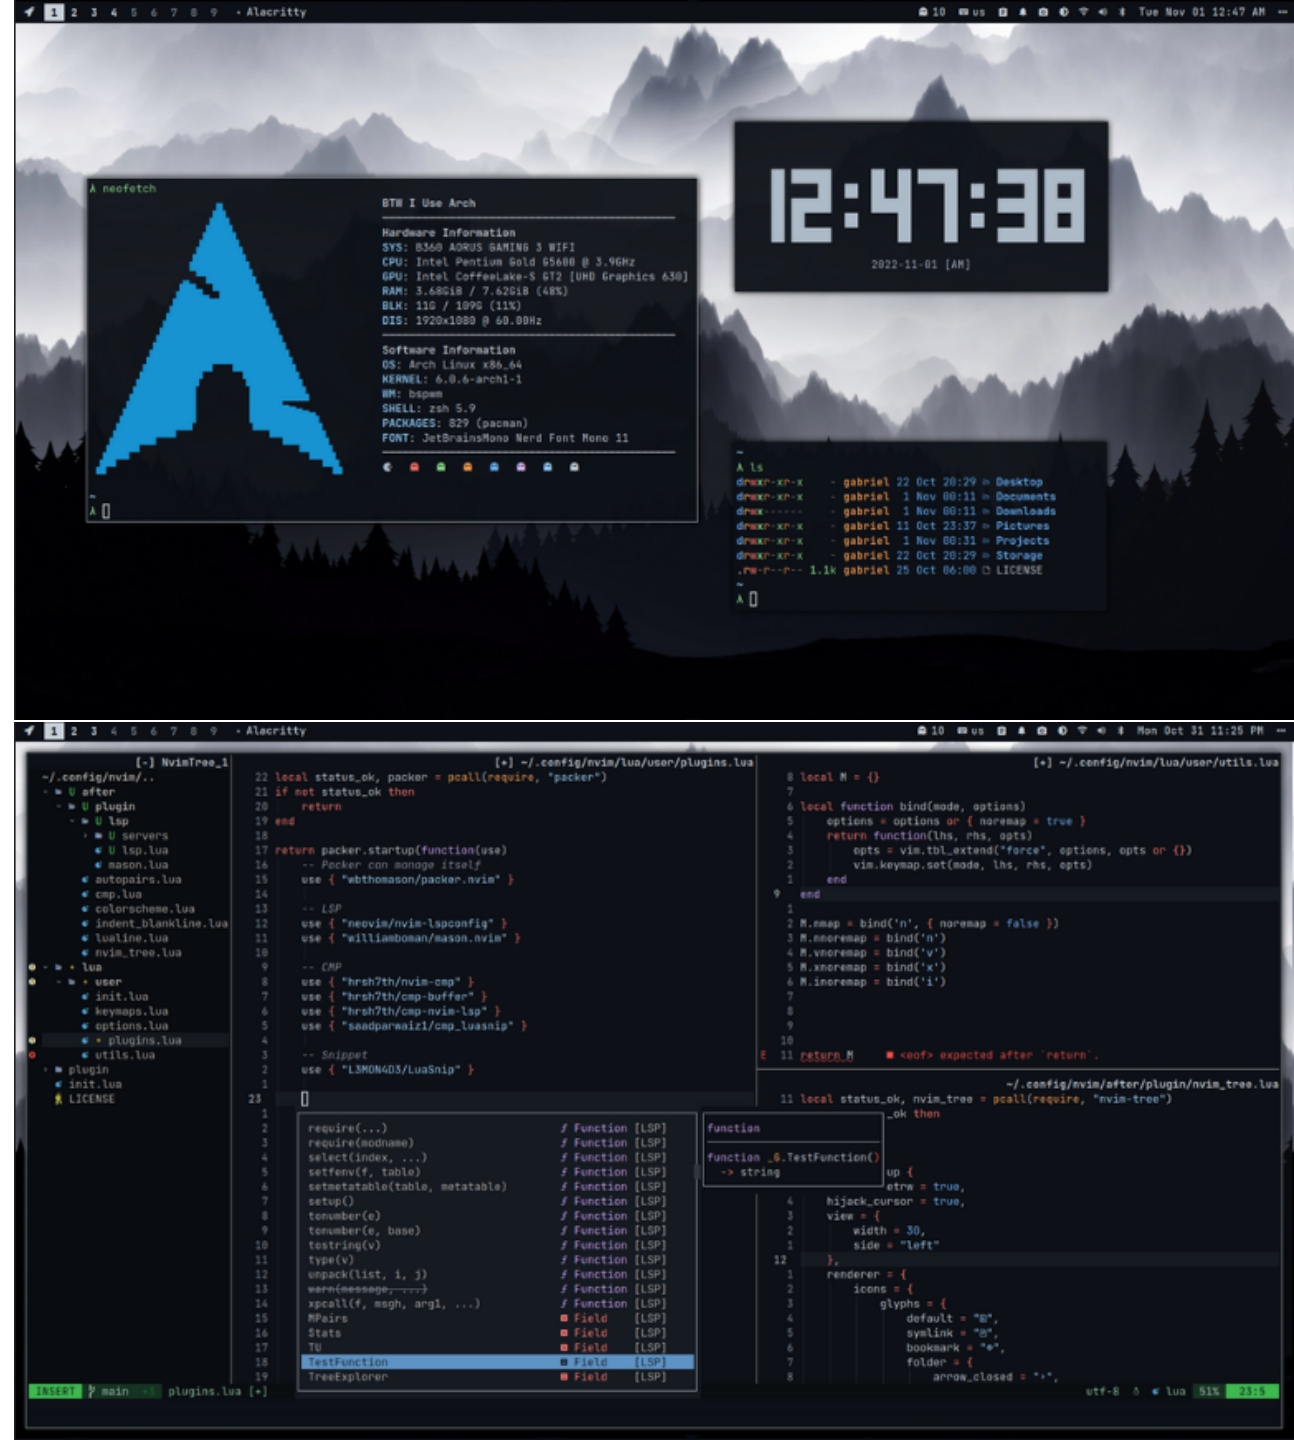

# Overview

We are going to building a simple TUI for git.

## Why

CLI tools are sexy.  
Embrace the terminal.

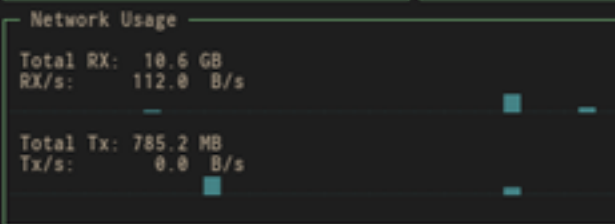

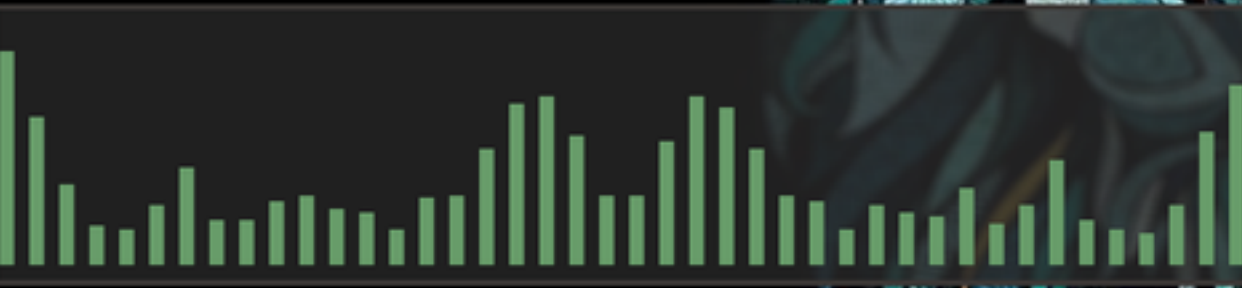

Disk	Mount	Used	Free	R/s
home	/home	79%	229GB	0B
log	/var_	21%	78GB	0B

Memory Usage
Main 28% 4.3GB/16GB
Swap 3% 265.9MB/8GB

Temperatures
coretemp_core0 68C
coretemp_core1 70C
coretemp_physicalid0 69C

Processes			
Count	Command	CPU%	Mem%
4	bro	15.5	3.8
9	splunkd	8.0	2.9
1	vmware-vmx	4.0	14.6
35	chromium	2.3	28.8
1	lt-cava	0.8	0.0
1	xfce4-terminal	0.5	0.1
1	Xorg	0.5	0.8
1	compton	0.4	0.1

Artist / Album	Track	Library
Ava Max	Sex, Love & Reggae	1:04:27
Big Sean	1. G Spot (intro)	2013 00:45
Blueface	2. A Reggae Morning	2013 03:49
Brantley Gilbert & Lindsay Ell	3. Be Alright	2013 03:15
Chance the Rapper	4. I'm So	2013 03:40
Cole Swindell	5. Overtime	2013 03:08
Dan + Shay	6. Vixen (feat. Angela Hunte)	2013 03:29
Dierks Bentley	7. Sex, Love & Reggae (feat. Bunji Garlin & Angela Hunte)	2013 03:21
Drake	8. Non Stop	2013 02:57
Ed Sheeran	9. Wet Fete (feat. KES the Band)	2013 03:58
Ella Fitzgerald	10. Turn Me On	2013 03:34
Gyptian	11. Wine Slow	2013 02:33
Katy Perry	12. One More Time (feat. Melanie Fiona)	2013 03:14
Keith Urban	13. Majestic Love (feat. Estelle)	2013 03:45
Khalid	14. Good Girls	2013 03:39
Gyptian - Sex, Love & Reggae - 7. Sex, Love & Reggae (feat. Bunji Garlin & Angela Hunte)		2013

[illegible]

# Requirements

They should be able to do the following from the TUI

- git add
- git commit
- git fetch (tells us if there are changes upstream.)
- git pull (brings the changes from upstream to local repo)
- git push
- change origin url (upstream url)

## Extra details

- Should be able to detect if current directory is a git directory, and if not it should ask if it should initialize a git repository
- We will not be handling any merge conflicts, that is out of scope. Can you think of way to handle this error?

# Example of some TUI apps

```
thunderclap:~ christian $
```

# Soft serve - git server

## Soft Serve

A tasty, self-hostable Git server for the command line

`git clone ssh://git.charm.sh/soft-serve`

# fm - a TUI file manager

The screenshot shows the 'fm' TUI file manager interface. The window title is 'knipferrc@EndeavourOS:~/git/fm'. The interface is split into two main panels. The left panel, titled 'Filetree', displays a list of 16 items in the current directory. The right panel, titled 'Help', lists various keyboard shortcuts and their functions. At the bottom, a status bar shows the current directory path and the number of items displayed.

```
knipferrc@EndeavourOS:~/git/fm
```

**Filetree**

16 items

**Help**

ctrl+c, q	Exit FM
j/up	Move up
k/down	Move down
h	Paginate left in current directory
l	Paginate right in current directory
space	Read file or enter directory
G	Jump to bottom
g	Jump to top
~	Go to home directory
.	Toggle hidden files
y	Copy file path to clipboard
z	Zip currently selected tree item
u	Unzip currently selected tree item
n	Create new file
N	Create new directory
x	Delete currently selected tree item
enter	Process command
E	Edit currently selected tree item
c	Copy currently selected tree item
esc	Reset input field
R	Go to root directory
tab	Toggle between boxes

.. /home/knipferrc/git/fm 1/16 FM

## Bonus

If we have extra time, try to implement the `git revert` feature.
